

- prevents mould and algae infection
- long-term protection, concentrated

Anti-Mould-Additive Concentrate (fungicidal paint additive)

Use

baufan® Anti-Mould-Additive Concentrate offers water-based products – e.g. emulsion paints, wallpaper adhesives, distempers, primers etc. – simple, long-term protection against microbial infection. For indoor and outdoor use.

Constituents

Fungicidal combination of active ingredients

Application

As additive for emulsion paints, wallpaper adhesives and similar water-based products:

Stir 250 ml baufan® Anti-Mould-Additive Concentrate into 10 ltr emulsion paint etc., mixing thoroughly, and apply as normal. Same mixing ratio applies for preparing wallpaper adhesive.

For remedial substrate treatment:

Clean substrate. Dilute 250 ml baufan® Anti-Mould-Additive Concentrate with 8 ltr water. Generously apply solution to infected surfaces in two wet-on-wet coats and allow to fully dry prior to further works.

For outdoor treatment:

Adopt same procedure for facades, plinths, roof tiles, Eternit and stone panels to provide these with effective, long-term protection against algae and green growth.

Application temperature

+5 °C to + 30 °C for material, ambient air and substrate

Warning!

Harmful if swallowed. May cause damage to kidneys through prolonged or repeated exposure if swallowed. May cause an allergic skin reaction. Causes skin irritation. Causes serious eye irritation. May cause long lasting harmful effects to aquatic life. Keep out of reach of children. Wear protective gloves/eye protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF ON SKIN (or hair): Take off immediately all soaked, contaminated clothing. Rinse skin with water or shower. Use only outdoors or in a well-ventilated area. If skin irritation or rash occurs: Get medical advice/attention. If medical advice is needed, have product container or label at hand. Avoid release to the environment.

Contains: Diethylene glycol, octylisothiazolinone.

Status: September 2020

Note:

All details and data presented in this information sheet are based on our practical experience and laboratory investigations, and reflect the current state of the art. They can, however, only serve as general guidance and shall provide no guarantee of specific properties or performance. Given that the conditions for storage, transportation and application of products are beyond our control, no legal liability may be construed from the information presented here. It shall be the responsibility of the user to check the product's suitability for the envisaged purpose under the specific site or project conditions.

Note

Keep out of reach of children. Ensure adequate ventilation during application and drying. Do not inhale spray mist. Refrain from eating, drinking and smoking during use. Wear goggles. In case of contact with eyes or skin, rinse immediately with plenty of water. Do not allow to enter drains, sewers, surface waters or ground. Hand over only fully emptied containers for recycling.

Biocidal Products Regulation (528/2012/EU):

Aqueous concentrate for in-can preservation (25-33 ml/ltr water-based product);

main group 2, product-types 6, 7 and 10.

100 g contain: 2.49 g 2-octyl-2H-isothiazol-3-one

BAuA (German Federal Institute for Occupational Safety and Health) reg. number:
N-43437, N-43438 and N-43439

Please exercise care in the use of biocidal products. Always read the label and product information prior to application.

Storage

Store in cool, though frost-free environment in properly sealed containers. Minimum shelf life in unopened containers subject to proper storage: see batch label.
